

## Agenda :

1. Exceptions
2. Hierarchy of exceptions
3. Throw vs Throws
4. Try-catch
5. Finally

Exceptions : an unintentional event that occurs during execution of code

```
function f() {  
    , function c();  
}  
  
function () {  
    db.query(" ");  
}
```

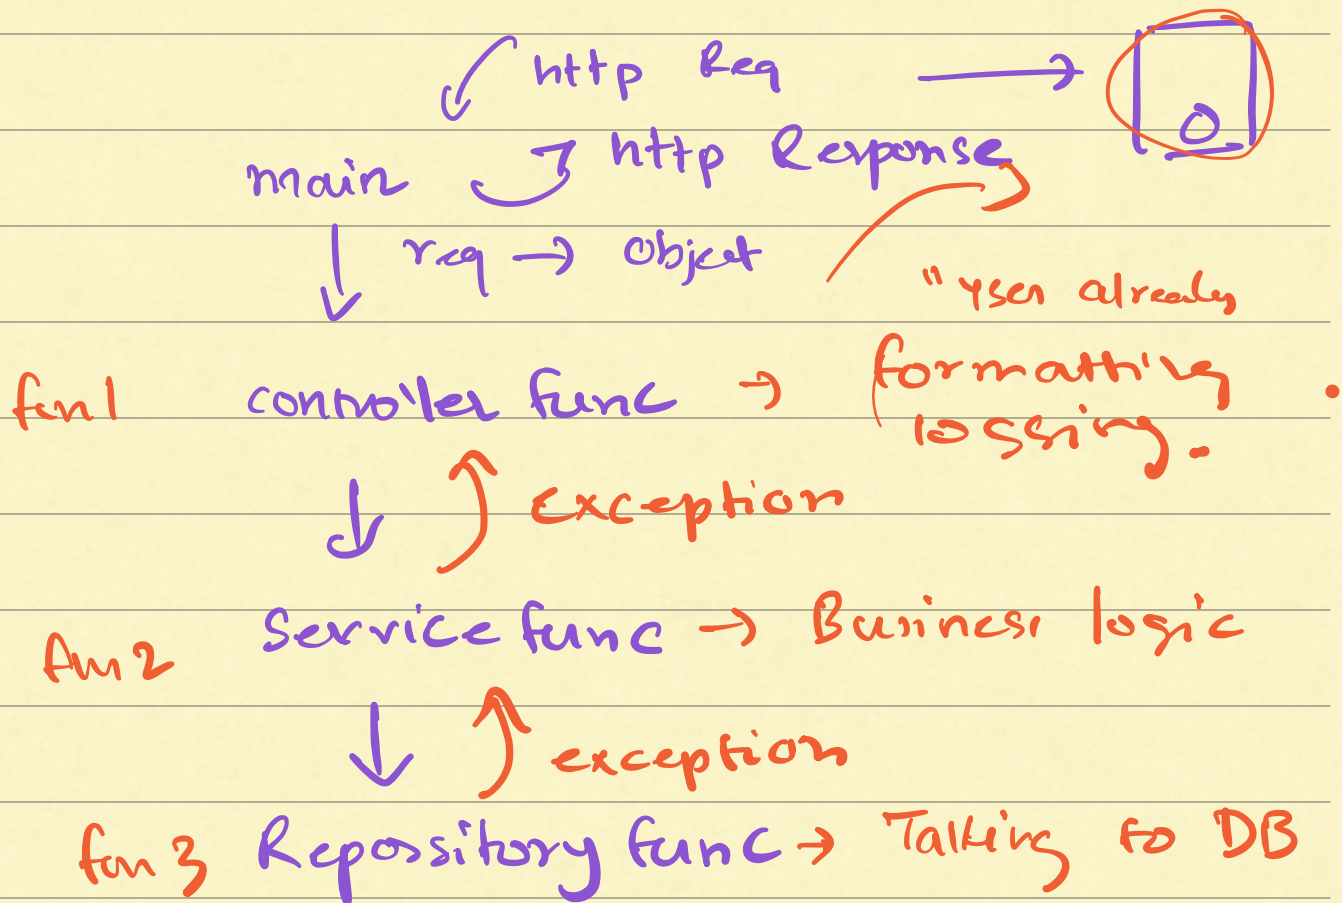

db connection breaks.

caller  
↑  
called

Types of Exceptions:

- 1) Exceptions (checked)
- 2) Runtime Exceptions (unchecked)

Exceptions  
↑

catch (DBNotConnect & e)?

↳ retry mechanism

db - query (" ")

Hierarchy :
